1. General Description

This Module SCT009005-V01 is TFT Liquid Crystal Display Module. This specification covers the delivery requirements for the liquid crystal display module delivered by quality to Customer.

1.1. Mechanical & Display Specifications

Item	Standard value	Unit
LCD Size	0.96	inch
Dot Matrix	80(RGB) × 160	pixel
Module Size	$13.54 \times 27.95 \times 1.50$	mm
Active Area	10.80×21.70	mm
Dot Pitch	0.135×0.1356	mm
Pixel Configuration	R.G.B. Stripe	-
Color depth	262K	-
Display Mode	Normally black, Transmissive	-
Technology Type	a-Si	-
Viewing Direction	All	-
Gray Scale Inversion Direction	All	-
Driver IC	ST7735S	-
Interface	4-line SPI	-
LED Numbers	1 LEDs	-
Weight	TBD	g

Note: Requirements on Environmental Protection: RoHS

1.2. Interface Pin

Pin No.	Symbol	Туре	Description			
1	GND	Р	Ground			
2	DCX	Ι	Data / Command selection input			
3	SCL	Ι	Serial clock			
4	RST	Ι	Reset signal input			
5	CS	Ι	Chip enable			
6	SDA	I/O	Serial data input/output			
7	GND	Р	Ground			
8	VCC	Р	Power supply			
9	LEDK	Р	LED backlight cathode (Negative)			
10	LEDA	Р	LED backlight anode (Positive)			

Note: TYPE definition: I-----Input O---Output P----Power/Ground

2. Electrical Characteristics

2.1. Absolute Maximum Rating

Item	Symbol	Min.	Max.	Unit	Remark
Power Supply	VCC	-0.3	4.6	V

Note:

1. Test equipment setup

After stabilizing and leaving the panel alone at a given temperature for 30 minutes, the measurement should be executed. Measurement should be executed in a stable, windless, and dark room. CA-210 of KONICA MINOLTA, which utilized for Chromaticity and BM-7 for other optical characteristics.

2. Definition of response time: T_R and T_F

The figure below is the output signal of the photo detector.

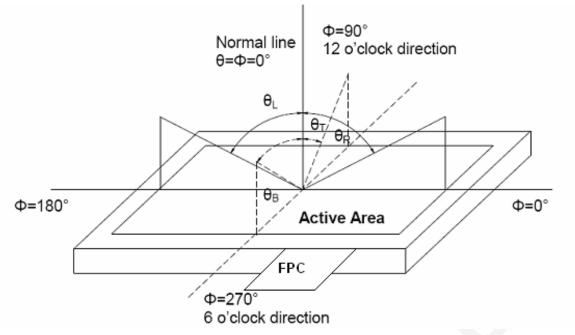

Luminance with all pixel black

4. The 100% transmission is defined as the transmission of LCD panel when all the input terminals of module are electrically opened.

CR=

5. Definition of viewing angle:

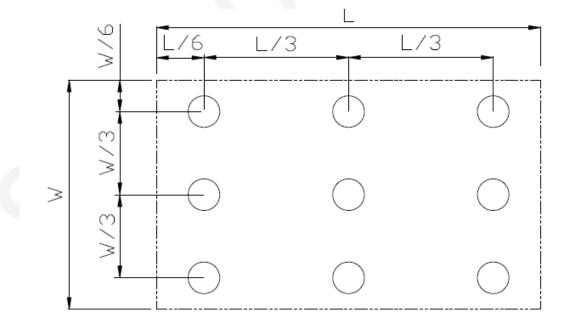

- 6. Definition of color chromaticity (CIE1931)
- Color coordinates measured at center point of LCD.
- 7. The color gamut data comes from the LCD panel specification under the C light source environment.
- 8. Definition of Luminance Uniformity

Active area is divided into 9 measuring areas (Refer Fig.). Every measuring point is placed at the center of each measuring area.

Luminance Uniformity(U) = L_{MIN} / L_{MAX}

L-----Active area length

W----- Active area width

 L_{MAX} : The measured maximum luminance of all measurement position.

L_{MIN}: The measured minimum luminance of all measurement position.

9. Definition of Luminance:

Measure the luminance of white state at center point.

4. Reliability

5. Precautions

5.1. Handling Precautions

(1) Protect the panel from static, it may cause damage to the CMOS Gate Array IC.

(2) Use fingerstalls with soft gloves in order to keep display clean during the incoming inspection and assembly process.

(3) If the liquid crystal material leaks from the panel, it should be kept away from the eyes or mouth. In case of contact with hands, legs or clothes, it must be washed away thoroughly with soap.

(4) The desirable cleaners are water, IPA (Isopropyl Alcohol) or Hexane. Don't use Ketone type materials (ex. Acetone), Ethyl alcohol, Toluene, Ethyl acid or Methyl chloride. It might permanent damage to the polarizer due to chemical reaction.

(5) Pins of I/F connector shall not be touched directly with bare hands.

(6) Refrain from strong mechanical shock and / or any force to the panel. In addition to damage, this may cause improper operation or damage to the panel.

(7) Note that polarizers are very fragile and could be easily damaged. Do not press or scratch the surface harder than a B pencil lead.

(8) Wipe off water droplets or oil immediately. If you leave the droplets for a long time, staining and discoloration may occur.

(9) If the surface of the polarizer is dirty, clean it using some absorbent cotton or soft cloth.

5.2. Storage Precautions

(1) Do not leave the panel in high temperature, and high humidity for a long time. It is highly recommended to store the panel with temperature from 0 to 35° and relative humidity of less than 70%.

(2) The panel shall be stored in a dark place. It is prohibited to apply sunlight or fluorescent light during the store.

5.3. Operation Precautions

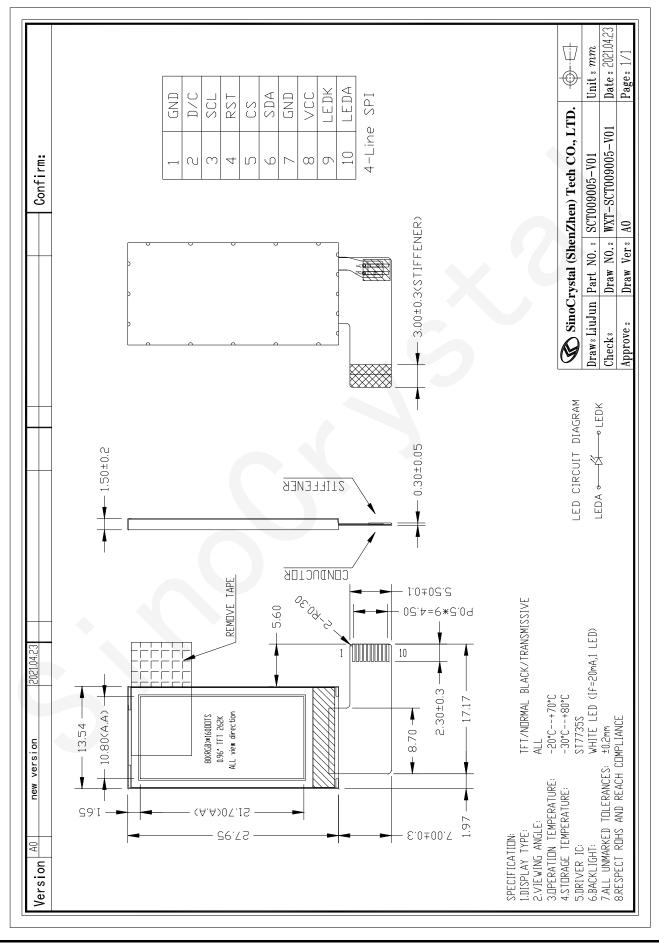

(1) The LCD shall be operated within the limits specified. Operation at values outside of these limits may shorten life, and/or harm display images.

(2) Do not exceed the absolute maximum rating value. (the supply voltage variation, Input voltage variation in part contents and environmental temperature and so on). Otherwise the panel may be damaged.

(3) If the panel displays the same pattern continuously for a long period of time, it can be the situation when the image" Sticks" to the screen.
